

Animal Report

First you need to choose an animal:

- Go to the library and find a book on animal
- Make sure the book has information you can understand
- You will be using the book in reading and in the library

After choosing the book, you need to start the research.

You have six questions you need to answer about your animal.

- What does it look like?
- What does it eat?
- Where does it live?
- How does it protect itself?
- How does it raise its babies?
- What are some other interesting facts?

After answering the questions, remember to write down where you found the information to answer the questions. You need to cite your sources.

You will write a rough draft of your answers for your classroom teacher. After your teacher has given you the ok, you will write a final draft that will be used to inform your classmates about your animal.
